DESCRIPTORS	Bond Issues; Bulletins; *Educational Finance; Political Issues; *School Budget Elections; *School Support; *School Taxes; *Statistical Data; Tables (Data); Tax Support; Voting
IDENTIFIERS	*California

ABSTRACT

The bulletin presents in tabular form the results of the sixth annual joint survey of 1971-72 tax, bond, and loan election results for the State of California. The first two tables report the results of tax elections and the results of bond or loan elections. In each table, the counties are reported alphabetically, with districts within each county that had a tax, bond, or loan election being likewise reported alphabetically. The appendixes provide summary tables showing the tax and bond election results by counties for the past five years and the loan election results for the year 1971-1972. During the 1971-72 school year, 164 school districts held 190 tax elections of which 50 percent were successful. Ninety-four districts held 113 bond elections of which 21.2 percent were successful. Fourteen school districts held a total of 16 elections called to authorize State loans for school construction with 37.5 percent of these elections being successful. (Author/DN)

INTRODUCTION

This *Bulletin* reports the results of the sixth annual joint survey of *"Tax, Bond and Loan Election Results"* sponsored by the California Teachers Association and the Association of California School Administrators. The time period covered was July 1, 1971, through June 30, 1972.

During the spring of 1972, the State Department of Education reviewed their reporting forms for tax, bond and loan elections. In doing so, they designed a new form so that the County School Department of Education could report all three elections for any one year on one form. Dr. Floyd E. Taylor, Chief, Bureau of Administrative Research and District Organization, sent the new form (Report R-5) to the county superintendents of education with an extra copy to be forwarded to the Research Department of California Teachers Association if they so desired.

ACSA and CTA then implemented this study by writing all county superintendents and requesting a copy of the new Report R-5. Consequently the information presented in this *Bulletin* includes all three election results, tax, bonds and loans.

All county school departments responded. During the 1971-1972 school year, 164 school districts held 190 tax elections of which 95 (50.0 percent) were successful, and 95 (50.0 percent) failed.

During the 1971-1972 school year, 94 districts held 113 bond elections of which 24 (21.2 percent) were successful, and 89 (78.8 percent) failed.

For the first time, the results of elections called to authorize State loans for school construction, were reported. Fourteen school districts held a total of 16 elections of which 6 (37.5 percent) were successful, and 10 (62.5 percent) failed.

Table I of this *Research Bulletin* reports the results of the tax elections and Table II reports the results of the bond or loan elections. In each table, the counties are reported alphabetically, with districts within each county that had a tax, bond or loan election being likewise reported alphabetically.

In the appendices is a summary of the tax and bond election results by counties for the past five years. A summary of the loan election results for the year 1971-1972, is also reported.

Both ACSA and CTA wish to thank the State Department of Education for participating in the cooperative effort to report information, while eliminating the duplication of reporting data to different agencies by the county superintendents of schools in California, of which this *Research Bulletin* is the result.
